

Americans, Almost and Forgotten

Tom C.W. Lin*

There are millions of Americans who are systematically forgotten and mistreated by our government. They have been described by the Supreme Court as “alien races” and “utterly unfit for American citizenship,” but they continue to fight and die defending our Constitution. They survive catastrophic storms, but do not receive the assistance that is freely given to other Americans. They are subject to federal laws and regulations, but have no meaningful voice or vote in Washington. They are the millions of Americans in Puerto Rico, Guam, American Samoa, the US Virgin Islands, and the Northern Mariana Islands—the unincorporated territories of the United States.

This Article is about these forgotten Americans, their longstanding political plight, and the pragmatic legal policies that could improve their lives and make them fully and equally American. It begins by providing a brief overview of each territory. Next, it investigates the plight of the territories, focusing on how interconnected factors relating to political powerlessness, economic dependence, military presence, and geographic isolation have created heavy burdens for people in the territories. Moving from problems to solutions, this Article examines past efforts to aid the territories. In particular, it analyzes past pursuits of litigation, statehood, and independence. It explains why these prior paths did not lead to progress, and discloses critical obstacles that continue to obstruct these routes. Finally, this Article proposes three workable ways for the federal government to assist the territories in the near term. Specifically, it argues that the territories and their supporters should focus on working with the federal government to obtain: (1) an extended temporary waiver of the

INTRODUCTION

There are millions of Americans on islands, near and far, that are systematically forgotten and mistreated by our government. They fight and die for our country, but have no right to vote for their Commander in Chief.¹ They are subject to federal laws and regulations, but have no voice in their enactment.²

1. *Igartua De La Rosa v. United States*, 32 F.3d 8, 9 (1st Cir. 1994) (interpreting art. II, § 1, cl. 2 and holding that “only citizens residing in states can vote for electors and thereby indirectly for the President.”); see U.S. CONST. art. I, § 2, cl. 1.; *id.* art. II, § 1, cl. 2.

2. See Jamin Raskin, *A Right-to-Vote Amendment for the U.S. Constitution: Confronting America’s Structural Democracy Deficit*, 3 ELECTION L.J. 559, 565 (2004) (“American citizens living

They have been characterized as “savage,”³ “half-civilized,”⁴ and “ignorant and lawless”⁵ in influential legal scholarship and widely-cited cases by the Supreme Court and lower courts, but continue to strive peacefully for rights and recognition in our judicial system.⁶ They endure catastrophic storms, but do not receive the assistance that is freely given to other Americans.⁷ They have been described by the Supreme Court as “alien races,”⁸ “utterly unfit for American citizenship,”⁹ and not of “a foreign country,” but “foreign to the United States in a domestic sense.”¹⁰ They are the over four million Americans on the islands of Puerto Rico, Guam, American Samoa, the US Virgin Islands, and the Northern Mariana Islands.¹¹ They are the almost and forgotten Americans of the unincorporated territories of the United States.¹²

In 2017, natural and human-made disasters brought the predicaments of several US territories into the national limelight. In August 2017, North Korea

in the federal Territories . . . have no right to vote for president and no voting representation in the Congress.”).

12. See Introduction, *Developments in the Law—The U.S. Territories*, supra note 6, at 1617. (“American Samoa, Guam, the Northern Mariana Islands, Puerto Rico, and the U.S. Virgin Islands — these five localities make up what we know as the U.S. territories. These unincorporated but organized territories exercise self-governance, while still sitting subject to the U.S. Congress’s plenary power.”).

announced a detailed plan for a missile attack on Guam in its conflict with the United States.¹³ A few weeks later, Puerto Rico endured the onslaught of two cataclysmic Category 5 hurricanes while it was already struggling with an unprecedented bankruptcy and economic crisis.¹⁴ Hurricanes Irma and Maria ravaged an already crumbling island, causing billions of dollars of damage, destroying essential infrastructure, and irreparably changing the daily lives and futures of the people of Puerto Rico.¹⁵ Hurricane Maria alone led to nearly 3,000 casualties in Puerto Rico by 2018.¹⁶ The two storms also had a catastrophic impact on the US Virgin Islands, destroying much of its beautiful habitat and shutting down many of its businesses for extended periods of time.¹⁷ As the American territories continue to struggle with these issues, much of the national and political attention has shifted away from them to the attention-grabbing political topics of the moment. Consequently, the Americans of the territories remain politically powerless, and are forgotten once again.

This Article is about these forgotten Americans, their longstanding political plight, and pragmatic policy reforms that could improve their near-term conditions and make them fully and equally American. Building on a rich body of interdisciplinary research that spans constitutional law, business law, political science, and applied economics, this Article offers an original descriptive and normative examination of these unincorporated American territories (the “Territories”).¹⁸ It charts the histories of these Territories, analyzes their current

challenges, highlights failed legal reform efforts, and recommends practical policy proposals for the near future.

This Article has two primary objectives. First, it strives to provide a cogent, contemporary narrative for understanding the current difficult legal, political, and economic conditions of the Territories. Second, it aims to recommend politically workable proposals for policymakers in Washington, D.C. and the Territories to improve the conditions of the people of the Territories in the near term. In pursuit of these objectives, this Article recognizes the longstanding legal and political obstacles that have made reforms for the Territories so elusive. As such, this Article does not seek to advance a grand theoretical framework that would hypothetically alleviate all the protracted political problems confronting the Territories. Rather, this Article advocates for more pragmatic, modest proposals that may be less satisfying in theory, but more meaningful in practice in the immediate future, given the current bleak realities in the Territories. Ultimately, this Article aspires to offer a new, workable roadmap for people and policymakers to think and act with greater urgency about the forgotten Americans of the Territories.

This Article unfolds in four parts. Part I offers a historical survey. It presents a brief overview of how each Territory became part of the United States and the current state of affairs of each Territory. It describes each Territory's American origin story, its geography, demography, and economic conditions. Part I lays out the historical contours for the subsequent discussions.

Moving from past to present, Part II examines the contemporary plight of the Territories. Marshaling data, history, and geography, it highlights how the residents of the Territories are frequently forgotten and treated as lesser Americans relative to their peers on the mainland. It focuses on how interconnected factors relating to political powerlessness, economic dependence, military presence, and geographic isolation have created a heavy crucible of burdens for the Americans of the Territories. It exposes the dire realities and outlooks of the Territories absent urgent action. Part II reveals the prosaic and profound impact of these systemic afflictions on the daily life and long-term prosperity of the Territories.

Part III pivots from problems to solutions. It analyzes past paths traveled to alleviate the plight of the Territories. In particular, it focuses on prior endeavors

States Entering the Union, 46 AM. J. LEGAL HIST. 119 (2004); Richard Briffault, *The Rise of Sublocal Structures in Urban Governance*, 82 MINN. L. REV. 503 (1997); Christina Duffy Burnett, *United States: American Expansion and Territorial Deannexation*, 72 U. CHI. L. REV. 797 (2005); José A. in connection with litigation, statehood, and independence to illustrate where and how previous paths to progress have fallen short. It explains critical obstacles that continue to obstruct these routes. Part III details the pitfalls of the past, and argues urgently for a new direction towards meaningful near-term progress for the Territories.

Part IV charts new ways forward. It proposes three workable proposals towards achieving tangible progress for the Territories. Specifically, it asserts that the Territories and their supporters should focus on (1) obtaining an extended temporary waiver of the costly maritime law known as the Jones Act,¹⁹ (2) acquiring most-favored state status in federal veterans and disaster relief appropriations, and (3) gaining special economic empowerment zone designations from the federal government. These new paths offer, at best, partial solutions to many of the large and longstanding problems confronting the Territories. At the same time, these proposals represent some of the most pragmatic and feasible means for near-term progress given the constraints of contemporary political realities while the larger open questions concerning political status are being debated and deliberated in the Territories and in Washington.

This Article ends with a brief, optimistic conclusion. It recounts the plight of the American territories, and it looks forward with hope to a future that makes complete and true the esteemed title of the people of the Territories: Americans.

I.

A BRIEF OVERVIEW OF THE TERRITORIES

Each of the Territories, except the Northern Mariana Islands, has been part of the United States for more than a century.²⁰ Each of the territories is also distinct in its local history, culture, economy, population, demography, and governance.²¹ Despite their differences, the Territories share a complex and often frustrating relationship with the United States. None of the people of the Territories have a vote in Congress or a vote for the President, as the Constitution limits the right to such votes to “the People of the several States.”²² Nevertheless, the people of the Territories are considered American citizens or nationals,

19. The Jones Act refers to Section 27 of the Merchant Marine Act of 1920. *See* 46 U.S.C. § 883 (2012).

20. *See infra* Part I.E. Table 1.

21. *See* Introduction, *Developments in the Law—The U.S. Territories*, *supra* note 12, at 1617 (“The territories all have unique histories and political perspectives, and their legal relationships with the United States vary accordingly.”).

22. U.S. CONST. art. I, § 2, cl. 1.; *id.* art. II, § 1, cl. 2. *See* *Igartúa v. United States*, 626 F.3d 592, 594 (1st Cir. 2010) (interpreting art. I, § 2, cl. 1 and holding that “[s]ince Puerto Rico is not a state, and cannot be treated as a state under the Constitution for these purposes, its citizens do not have a constitutional right to vote for members of the House of Representatives”); *Igartua De La Rosa v. United States*, 32 F.3d 8, 9 (1st Cir. 1994) (interpreting art. II, § 1, cl. 2 and holding that “only citizens residing in states can vote for electors and thereby indirectly for the President”).

subject to the rule of the federal government.²³ The people of the Territories live under the American flag, but not the American Constitution, contrary to the old anti-imperialist notion that “the Constitution follows the flag.”²⁴ What follows is a brief overview of each Territory in the order that they became part of the United States, starting with the oldest Territory of Puerto Rico in 1898 to the youngest Territory of the Commonwealth of the Northern Mariana Islands (CNMI) in 1975.

A. Puerto Rico

The United States acquired Puerto Rico through the Spanish-American War in 1898.²⁵ The residents of Puerto Rico were conferred US citizenship in March 1917 under the Jones-Shafroth Act.²⁶ In 1950, Congress authorized Puerto Rico to create a constitution and organize a government with the passage of what is commonly referred to as Public Law 600.²⁷ In 1952, Puerto Rico convened a constitutional convention to draft a constitution that was subsequently approved by the people of Puerto Rico and Congress.²⁸ The constitution established the Commonwealth of Puerto Rico, a unique “territory of the [United States] with commonwealth status.”²⁹

Despite being US citizens, residents of Puerto Rico do not have voting representation in Congress and cannot vote in presidential elections, except in party primaries.³⁰ One non-voting resident commissioner represents Puerto Rico in the House of Representatives.³¹ The resident commissioner can serve on House Committees and can speak, introduce bills, and offer amendments while

31. 48 U.S.C. § 891 (2012).

the House is conducting business as the Committee of the Whole.³² However, the commissioner cannot vote on any final legislation.³³ The resident commissioner serves a four-year term.³⁴

Present-day Puerto Rico is a storm-ravaged Territory with a large, but declining population.³⁵ The Territory had a population of around 3.7 million people as of the 2010 census, a population larger than twenty-one of the States in the Union.³⁶ Its economy has been shrinking for the past decade with its per capita income about one-third of that of the United States and its debt exceeding seventy billion dollars.³⁷ Estimates suggest that the unemployment rate on the island ranged from 9.8–11.5 percent in 2017.³⁸ According to the US Census, in a 2015 survey, 46 percent of Puerto Rico's population lives below the federal poverty level, compared to the 14.7 percent for the rest of the nation.³⁹ More alarmingly, 58.3 percent of children under eighteen live in poverty, and 63.7 percent of children under five live in poverty—both figures are more than twice the national rates for these age groups.⁴⁰ Consequently, a significant number of residents depend on Medicaid and other forms of federal government assistance for the poor.⁴¹ The 2017 storms exacerbated these troubling conditions.⁴² In the aftermath of the recent storms, it has been estimated that hundreds of thousands

of former residents of Puerto Rico, many of them with great reluctance and guilt, have migrated to the mainland to seek refuge from the island's dismal conditions.⁴³

B. Guam

The United States acquired Guam, like Puerto Rico, in 1898 in the Spanish-American War.⁴⁴ During World War II, Japan occupied Guam from 1941 until its liberation by American forces in 1944.⁴⁵ The residents of Guam subsequently received U.S. citizenship in 1950 under the Organic Act of Guam.⁴⁶ The Organic Act also established a local bill of rights and a directly elected unicameral legislative body for the island.⁴⁷ Pursuant to Section 3 of the Organic Act, federal supervision over Guam has long resided in the US Department of the Interior.⁴⁸

In 1976, Congress authorized Guam to create a constitution and organize a government.⁴⁹ Guam proposed a constitution in 1977 and President Jimmy Carter subsequently approved it in 1978.⁵⁰ However, the people of Guam rejected the constitution in a plebiscite in 1979, due in part to major disagreements among local political factions.⁵¹ No constitution has been proposed since that rejection.

Like residents of Puerto Rico, residents of Guam do not have a voting representative in Congress and cannot participate in presidential elections, except during the party primaries.⁵² Since 1972, a non-voting delegate has represented Guam in the House of Representatives.⁵³ The delegate serves a two-

year term⁵⁴ and possesses the privilege to speak and vote in House Committees, but does not have any voting powers over final legislation.⁵⁵

Today, like in the past, Guam is geopolitically important to the United States because of its location in the Pacific.⁵⁶ It has long served as a strategic hub for US military operations and concerns in Asia and the greater Pacific Rim, as its military bases are the home to “thousands of military personnel” and countless weaponry.⁵⁷

Despite its strategic importance, Guam’s economy suffers from stagnation. As of 2016, the island’s population was roughly 160,000 people.⁵⁸ The economy is tourism-based, dependent largely on tourists from Japan and South Korea.⁵⁹ Despite being a leading tourist destination in Asia and the booming economic conditions in the United States and many nearby Asian countries, the economy of Guam has experienced no significant growth in recent years.⁶⁰ Accordingly, the unemployment rate of the island has historically been greater than the national average. For instance, in 2017, the unemployment rate in Guam was around eight percent compared to the national rate of around four to five percent.⁶¹

C. American Samoa

American Samoa consists of five main islands.⁶² The United States claimed the islands through a treaty with Great Britain and Germany in 1900, and the leaders of the territory began ceding the islands to the United States in 1900 and 1904.⁶³ Congress approved American Samoa's cessations in the Ratification Act of 1929, making American Samoa an American territory.⁶⁴ The US Navy initially governed American Samoa for more than half a century beginning in 1900; the Interior Department took over its administration in 1951.⁶⁵ While American Samoa has self-governing authority over many local matters under the territorial constitution it enacted in 1967,⁶⁶ it is ultimately under supervision by the Department of the Interior.⁶⁷

Like the other Territories, American Samoa has limited political representation in the United States. A non-voting delegate represents American Samoa in the House of Representatives, and serves a two-year term.⁶⁸ The delegate possesses speaking and committee-voting privileges, but no voting powers in connection with final legislation.⁶⁹ However, unlike the other Territories, where Congress conferred citizenship to the people of each Territory, Congress enacted no such enabling act for the people of American Samoa.⁷⁰ Accordingly, American Samoans are non-citizen nationals of the United States.⁷¹ They reside in an "interstitial" space in law and fact, with some, but not all, of the rights and privileges that accompany citizenship.⁷² As non-citizen nationals, American Samoans are ineligible for many government jobs, benefits, and privileges that are afforded only to citizens of the United States.⁷³

Today, American Samoa remains a small landmass with a simple economy. American Samoa has a population of approximately 50,000 residents.⁷⁴ The territory has “a traditional Polynesian economy in which more than 90% of the land is communally owned.”⁷⁵ Some economic data shows that the Territory’s economy has been stagnant over the past decade.⁷⁶ The tuna industry, particularly canned tuna exporting, is the backbone of the Territory’s economy, with fish processing accounting for 15.5 percent of the employment in the territory in 2015.⁷⁷ American Samoa’s heavy reliance on this single industry makes its economic fortunes subject to the changing tides of tuna supply, tuna demand, and trade policies that are often beyond their control.⁷⁸

D. US Virgin Islands

The United States purchased the US Virgin Islands from Denmark for twenty-five million dollars in 1917.⁷⁹ US citizenship was conferred to the people of the US Virgin Islands in 1927.⁸⁰ The Organic Act of the Virgin Islands of 1936 divided the territory into two municipalities—the municipality of Saint Croix and the municipality of Saint Thomas—and established a government for each.⁸¹ The Revised Organic Act of 1954 repealed the previous Act and created a unified government with a single legislature.⁸²

In October 1976, Congress passed an act that authorized the people of the US Virgin Islands to “organize governments pursuant to constitutions.”⁸³ Constitutions were drafted in 1964, 1971, 1977, 1980,⁸⁴ and most recently in

2010.⁸⁵ However, due to various objections from ethnic minority groups in the territory, no local constitution has ever been adopted.⁸⁶ Federal authority over the US Virgin Islands ultimately resides in the US Department of the Interior.⁸⁷

The political relationship between the US Virgin Islands and the United States resembles that of the other Territories. For example, U.S. Virgin Islanders do not have voting representation in Congress and cannot participate in presidential elections, except in the party primaries.⁸⁸ Since 1972, a single non-voting delegate has represented the US Virgin Islands in the House of Representatives.⁸⁹ The delegate serves a two-year term⁹⁰ and possesses speaking and committee-voting privileges. However, similarly to the structure in other Territories, the delegate has no voting powers in connection with final legislation.⁹¹

Today, the US Virgin Islands is a moderately populated Territory with a stagnant economy that is highly dependent on tourism. The US Virgin Islands are home to more than 100,000 citizens.⁹² Its primary economic activity is tourism, with tourism related activities accounting for nearly forty-seven percent of the Territory's gross domestic product.⁹³ Despite its reputation as a tourist destination, the economy of the US Virgin Islands has been generally stagnant over the last few years despite occasional periods of tepid growth.⁹⁴

Unfortunately, the horrific storms in 2017 exacerbated these conditions, hurting the local economy and its near-term economic outlook.⁹⁵

E. Northern Mariana Islands

The Commonwealth of the Northern Mariana Islands (CNMI), an archipelago of fourteen islands in the Pacific Ocean, became a Territory in 1976.⁹⁶ Prior to 1976, the CNMI was known as the Trust Territory of the Pacific Islands, which came under the administration of the United States pursuant to a trustee agreement with the United Nations in 1947.⁹⁷ In 1976, the CNMI entered into a covenant with the United States that made the island an American territory with self-governing commonwealth status, and conferred American citizenship on the people of the CNMI.⁹⁸ The CNMI is self-governing under its local constitution, enacted in 1977.⁹⁹ Similar to many of the other Territories, the CNMI is under the supervision of the US Department of the Interior.¹⁰⁰

Like the other Territories, the CNMI does not enjoy full political participation at the national level. The people of CNMI do not have voting representation in Congress and cannot participate in presidential elections, except in party primaries.¹⁰¹ Since 1972, the CNMI has been represented by a single non-voting delegate in the House of Representatives.¹⁰² The delegate serves a two-year term,¹⁰³ and possesses speaking and committee-voting privileges, but no voting powers in connection with final legislation.¹⁰⁴

The CNMI has experienced recent economic growth, but struggles with unemployment and poor economic diversification, especially in the wake of a

devastating storm in October 2018. As of the 2010 census, the CNMI had a population of over 50,000 citizens.¹⁰⁵ Most of the CNMI's population lives on the islands of Saipan, Rota, and Tinian.¹⁰⁶ In contrast to the other territories, its gross domestic product is stable and has been increasing for the past several years—by 3.8 percent in 2015 and 28.6 percent in 2016—but its unemployment rate has historically been higher than the national rate.¹⁰⁷ Tourism and private investment primarily accounted for the GDP increase in 2016, particularly the construction and opening of the Imperial Pacific Resort, a large casino resort, on the island of Saipan. The casino project initially created short term increases in jobs and revenues on the CNMI, but it has also caused significant negative socioeconomic effects, such as increased criminal activity.¹⁰⁸ In 2018, Super Typhoon Yutu, one of the strongest storms on record, destroyed the CNMI, leaving much of the island in disrepair.¹⁰⁹ Following the storm, the aforementioned casino resort closed for an extended period of time and laid off many of its employees.¹¹⁰

* * *

The Territories have each traveled different paths to become part of the United States. Despite their different histories, they are all subject to the rule and whim of the federal government without any meaningful political power over their self-governance at the national level. The table below summarizes the duration of American rule over each territory and the number of people, as of 2010, subject to this form of forgotten and incomplete American status.

II.

THE PLIGHT OF THE TERRITORIES

As a result of their legally peculiar and politically strained relationship with the United States, the people of the Territories suffer from certain longstanding, historical afflictions that hinder them from becoming full Americans and enjoying an equal status as their fellow citizens in the States.¹¹⁸ Chief among these afflictions are the interrelated pre-existing conditions of political powerlessness, economic distress, military presence, and geographic isolation. Collectively, these afflictions place pedestrian and profound burdens on the people of the Territories.

A. Political Powerlessness

The Americans of the Territories are largely politically powerless and lack many of the decision-making privileges as compared to the Americans living in the States. As non-states, the Territories are subject to the plenary powers of

It was born in large part out of colonial impulses, the vestiges of which can still be seen in circuit and Supreme Court precedent today[.]”).

Congress. The Territorial Clause of the Constitution imposes very few limitations on Congress's plenary powers.¹¹⁹ The Territories have various forms of limited, local self-governance, but they are ultimately subject to the federal laws and regulations enacted in Washington, D.C.¹²⁰ Though this is similar to the political condition of the States, one major difference is that unlike the States, the Territories do not have a voting representative in the House or Senate that can advocate on their behalf.¹²¹ Congress has never used its plenary powers to give Congressional voting rights to representatives from the Territories on legislation, regulation, and treaties. The Territories also do not have an electoral vote in the Electoral College for presidential elections.¹²² It should be noted that the residents of the District of Columbia also do not have voting representation in Congress, but they do have a constitutionally enshrined right to vote in the Electoral College for President and Vice President under the Twenty-Third Amendment.¹²³

The powerlessness of the Territories renders them like colonies of bygone eras.¹²⁴ In fact, the United Nations Special Committee on Decolonization

MALAVET, AMERICA'S COLONY: THE POLITICAL AND CULTURAL CONFLICT BETWEEN THE UNITED STATES AND PUERTO RICO 3–4 (2004) (arguing that Puerto Rico remains an American colony); Sasha Davis, *The US Military Base Network and Contemporary Colonialism: Power Projection, Resistance and the Quest for Operational Unilateralism*, 30 POL. GEOGRAPHY 215, 216–22 (2011) (discussing the "contemporary imperialism" of American military

actually lists three of the Territories—American Samoa, Guam, and the US Virgin Islands—as three of the last seventeen remaining non-self-governing colonies in the world.¹²⁵ Senator Elizabeth Warren summed up the political plight of the Americans living in the Territories as follows:

This kind of second-class status is not how our government is supposed to work and it has real implications. . . . The four million people who live in the territories are not the subjects of a King. They are Americans, they live in America. But their interests will never be fully represented within our government until they have full voting rights—just like every other American.¹²⁶

This neocolonial status, as evidenced in part by a lack of political power over self-governance, has created practical consequences for the Territories.¹²⁷ For example, normal federal governmental activities—like the statistical collection of data about economic conditions, labor markets, local populations, and disease—do not exist in a reliable way in the Territories, and so policymakers frequently do not have sound data to make policies in connection with the Territories. Moreover, because the modern presidency and the executive branch possess so much power in contemporary governance via a vast federal administrative state, the Territories suffer a real political deficit by not having a vote for the presidency that oversees agencies and regulations that directly impact their people.

Given their lack of political power in Washington, the Territories are frequently subjected to legislation, executive action, and regulation that damage their interests without their consent or input.¹²⁸ A 2005 Government Accountability Office study indicated that the Territories received substantially lower federal Medicaid funds relative to the States, and their Medicaid funds are

forces on Guam and Puerto Rico); Introduction, *Developments in the Law—The U.S. Territories*, *supra* note 12, at 1624 (2017) (“[T]he U.S. territories remain bound to their essentially colonial status.”).

128. See Introduction, *Developments in the Law—The U.S. Territories*, *supra* note 12, at 1624 (“Congress continues to legislate in ways that subject, disadvantage, or quite frankly forget the U.S. territories.”); Torruella, *Ruling America’s Colonies* *supra* note 120, at 82 (“Supreme legislative power therefore lies solely in an institution that enacts laws without any effective participation or consent from the U.S. citizens who are obligated to comply with them . . . [W]hat exists is government without consent of the governed.”).

subject to a cap that does not exist for the States.¹²⁹ According to the study, “the states averaged \$565 [per capita] compared to between \$33 and \$65” for the Territories. The poorest States received “more than 12 times the amount” that was appropriated to any Territory.¹³⁰ Furthermore, in some instances, American citizens are denied certain federal benefits simply because of their residence in a territory, as opposed to a state. For example, in 2018, federal lawsuits were filed against the US Social Security Administration by a woman who was denied Social Security Supplemental Income disability benefit by virtue of her residence on Guam, while her twin sister residing in Pennsylvania received the federal benefit.¹³¹

A particularly consequential area where the lack of political power among the Territories hurts their interests is in the area of tax legislation. Residents of the Territories, with some exceptions, generally do not have to pay federal income tax, but are nevertheless subject to other federal tax laws.¹³² In fact, federal law currently requires that Guam, CNMI, and the US Virgin Islands have local tax laws that mirror those of the federal Internal Revenue Code.¹³³ This means that any changes in federal tax law would apply to these Territories and have serious adverse consequences without their consent or input. For instance, the landmark Tax Cuts and Jobs Act of 2017, which made dramatic changes to the Internal Revenue Code, will have significant adverse effects in the coming years for the Territories.¹³⁴ As a result of the mirroring mandate, Guam, for example, has projected significant forthcoming revenue shortfalls in its future budgets due to changes made in the federal tax code in 2017 that the local tax law must mirror.¹³⁵

The adverse impact of federal tax legislation also impacts the non-mirroring Territories of American Samoa and Puerto Rico.¹³⁶ Most notably, in 1996, Congress repealed a tax incentive encapsulated in section 936 of the Internal Revenue Code that had attracted many pharmaceutical companies and other businesses to Puerto Rico in the previous two decades.¹³⁷ Section 936 created a one-for-one tax credit for any income generated in Puerto Rico (and the other Territories) by American businesses that could be used to offset their federal income tax liabilities.¹³⁸ This meant that the income generated by the American companies in Puerto Rico was essentially tax-free.¹³⁹ As a result of the repeal, there was a mass exodus of businesses from Puerto Rico, and a booming economy became a shrinking one over the course of a decade.¹⁴⁰ More recently, following the passage of the Tax Cuts and Jobs Act of 2017, Puerto Rico has been categorized as a foreign jurisdiction for American businesses based there—as a result, American businesses will be taxed at a new higher rate of 12.5 percent on its intellectual property related income.¹⁴¹ The adverse impact of the new tax law comes at a time when Puerto Rico is struggling to recover and rebuild from its financial crisis and the devastation left by two hurricanes in 2017.¹⁴²

Beyond tax policy and unfavorable federal legislation generally, the lack of political power for the Territories leaves them vulnerable to the outright commandeering of the territorial government by the national government, as evidenced by the recent efforts in Puerto Rico. In 2016, Congress passed the Puerto Rico Oversight, Management, and Economic Stability Act (PROMESA) and established a special board to oversee the island's debt restructuring and economic recovery.¹⁴³ The President of the United States appointed the seven official members of the PROMESA oversight board with recommendations provided by the House of Representatives and the US Senate, without any vote

from the people of Puerto Rico.¹⁴⁴ The Governor of Puerto Rico sits on the board as a non-voting, *ex officio* member.¹⁴⁵

The PROMESA oversight board possesses broad, unfettered authority that supersedes the powers of Puerto Rico's legislature and governor.¹⁴⁶ The board has *in its sole discretion* the power to approve the local budget, reject any fiscal plans, order hiring freezes, demand any information it wants from the government of Puerto Rico, and void any local law that it deems objectionable.¹⁴⁷ It is hard to imagine Congress establishing or even proposing an uber-powerful unelected board to take over the governance of any one of the fifty States. Politically, a PROMESA-like commandeering of any state would be a non-starter. Legally, such a commandeering would likely also run afoul of the Constitution.¹⁴⁸ But because Puerto Rico is not a State and has no political power in Washington, it is now governed by an unelected seven-person board appointed by a President it also had no say in electing to office.¹⁴⁹

In sum, the lack of political power is a serious affliction for the Territories and their people. It means that they are frequently subjected to laws and regulations in tax and elsewhere that are beyond their control and without their consent, often with dire consequences. Ultimately, the lack of meaningful political power for the Territories makes it difficult for them to advocate for their people, to fully exercise their rights, to fully participate in our democracy, and to fully realize their potential as Americans.

B. Economic Distress

All of the Territories are under some level of economic distress, despite significant growth in the national economy over the last decade.¹⁵⁰ The lack of political power on the national level makes it difficult for the Territories to chart their own economic paths forward relative to the States and their regional

competitors. The economic distress in the Territories has only exacerbated their plight.

The economies of the Territories are stagnant or in decline compared to the national economy over the last two decades.¹⁵¹ The Territories have experienced slow or negative growth during a period of national economic boom.¹⁵² While Americans in the States have benefited from a period of growth (albeit unevenly), the people of the Territories have suffered from some of the highest rates of unemployment, the lowest standards of living, and the lowest per capita income of all US citizens.¹⁵³ In recent years, during a period of national economic expansion, some of the Territories have had unemployment rates more than double the national rate.¹⁵⁴ Furthermore, critical economic infrastructures—like power plants, water systems, and roads—that help to attract businesses in many parts of the Territories are in disrepair and in need of much improvement, even prior to the catastrophic storms that hit Puerto Rico and the US Virgin Islands in 2017.¹⁵⁵

Without meaningful organic economic growth, the Territories have had to accumulate significant debt, and rely on subsidies from the federal government. According to a 2017 Government Accountability Office study, each of the Territories has severely onerous debt obligations that impede their fiscal and economic futures.¹⁵⁶ In addition to massive borrowings, due to economic distress, the Territories have had to rely heavily on subsidies and grants from the federal government which now accounts for anywhere between 20 and 40 percent of a Territory's total annual revenues.¹⁵⁷ These subsidies frequently come with conditions, and are ultimately subject to the whims of lawmakers in Washington.¹⁵⁸ The uncertainties that surround federal government appropriations and the lack of meaningful political power in Washington makes long-term planning and investments incredibly difficult in the Territories.

As a result of the prolonged economic distress, there has been a sense of hopelessness in the Territories as evidenced in part by the alarmingly high rates of suicide attempts and mass migration of people away from their homelands.¹⁵⁹ Young and talented individuals frequently leave the Territories for school or better employment opportunities in the continental United States or abroad, and never return.¹⁶⁰ This talent drain from the Territories makes it even more difficult

for a sustainable, short-term economic recovery, as businesses are unlikely to invest in places with declining populations and scarce high-quality labor; thereby leading to more economic contraction.¹⁶¹

This vicious death spiral of economic decline in the Territories is perhaps most evident in Puerto Rico.¹⁶² Even before the disasters of the hurricanes in 2017, Puerto Rico was already in an economic catastrophe.¹⁶³ It had unpaid debt and pension obligations of about \$123 billion.¹⁶⁴ By way of comparison, Detroit's bankruptcy in 2013, which was then the largest municipal bankruptcy in U.S. history, was only for obligations of about \$18 billion.¹⁶⁵ In recent years, the poverty rate on the island was "46 percent, and 58 percent for children—about three times that of the 50 states."¹⁶⁶ Its basic utilities that provide modern necessities like power and water were, and continue to be, in shambles.¹⁶⁷ For instance, in the years before the storms of 2017, many residents of Puerto Rico had problems securing safe drinking water, and the situation has only been made

worst by the storms.¹⁶⁸ In light of this economic crisis and its uncertain future, people have been leaving Puerto Rico in droves, even before the storms in 2017.¹⁶⁹ It has been estimated that Puerto Rico will lose about “40 percent of its population by 2050.”¹⁷⁰ In fact, there are more Puerto Ricans in the continental United States than in Puerto Rico.¹⁷¹ And, as discussed in the previous section, Puerto Rico is now under the oversight of an unelected, federally appointed PROMESA board, to oversee the largest municipal reorganization in US history.¹⁷²

The predicament in Puerto Rico, while dire, may someday also describe the situation of the other Territories.¹⁷³ If the current economic distress persists in the other Territories, it is not hard to see a future where all or many of the Territories will suffer from the same fate as Puerto Rico. In fact, the legislation that created the PROMESA board defined “territory” to include Guam, American Samoa, the CNMI, and the US Virgin Islands, in addition to Puerto Rico, so some policymakers have already contemplated a future where other Territories may need intervention similar to present-day Puerto Rico.¹⁷⁴

C. Military Presence

The US military and its legacy play a significant role in the Territories, particularly in Puerto Rico and Guam.¹⁷⁵ For both of these Territories, the large military presence and its legacy has brought with it significant benefits as well as serious costs.

For Puerto Rico, US military presence is largely a relic of history, but its impact and influence continues on the island. The US military had a significant

presence on the island in preparation for World War II.¹⁷⁶ Large air force and naval facilities like Ramey Air Force Base, Roosevelt Roads Naval Station, and the Atlantic Fleet Weapons Training Facility on Vieques are now all closed after decades of operation.¹⁷⁷ These base closures were a major contributing factor to the long term economic decline of Puerto Rico's economy.¹⁷⁸

In Guam, the US military presence is an ongoing, existential matter that affects almost every part of daily life on the island.¹⁷⁹ The military occupies a significant proportion of the island's limited real estate, accounts for a large part of economic activity, and makes up a big part of the local population.¹⁸⁰ On Guam, the military occupies nearly thirty percent of the land.¹⁸¹ Anderson Air Force Base on Guam is one of the most important American military installations in the world.¹⁸² It is the home to over "100,000 bombs and missiles and 66 million gallons of jet fuel at any one time."¹⁸³ Active duty service personnel and their dependents constitute nearly ten percent of the local population of Guam.¹⁸⁴ The military is also one of the largest employers and economic players on Guam.¹⁸⁵ With base closures in Okinawa, Japan and the rising threats of China and North Korea, the military significance of Guam is rising, as evidenced by

the recent military build-up on the island.¹⁸⁶ Given the large and longstanding military presence on the island, the people of Guam have one of the highest rates of military recruitment and participation of any State or Territory.¹⁸⁷

While the strong US military presence and its legacy has brought with it some benefits for the Territories, it has also brought significant burdens. First, in every war since World War II involving the United States, the people from the Territories have enlisted and died at one of the highest per capita rates relative to their peers from the States.¹⁸⁸ In fact, American Samoa, has “the highest rate of military enlistment of any U.S. state or territory.”¹⁸⁹ Like their fellow soldiers from the States, they fight and die for the United States, often in disproportionate numbers; unlike their fellow soldiers, they have no say in American foreign affairs, military policy, veterans affairs, or the election of their Commander-in-Chief.¹⁹⁰

Second, large-scale long-term military exercises and munitions tests in the Territories have left lasting environmental, psychological, and healthcare consequences in ways not experienced by the States.¹⁹¹ For instance, the US

186. See NAVAL FACILITIES ENGINEERING COMMAND PAC. PEARL HARBOR, HI, SUPPLEMENTAL ENVIRONMENTAL IMPACT STATEMENT: GUAM AND COMMONWEALTH OF THE NORTHERN MARIANA ISLANDS MILITARY RELOCATION (2012 ROADMAP ADJUSTMENTS), at ES-1–ES-4 (2015); Davis, *supra* note 124, at 222 (“As of 2011, the planned increase in military operations in Guam is extensive. Guam is not only slated to receive the 8000 Marines from Okinawa as well as 9000 of their dependents, but also a new wharf to host an aircraft carrier, a center for a new Global Hawk UAV (unmanned aerial vehicle) program, a missile defense site, and numerous training areas (some requiring the acquisition of more land).”); *Military Buildup Seen as Boom, Test for Tiny Island of Guam*, *supra* note 185.

REV. 259, 276 (2017) (“Americans who reside in non-state areas have a long history of distinguished military service. Yet the same people who have sacrificed so much defending democracy overseas are denied full democratic participation at home.”).

191. See, e.g., LEIBOWITZ, *supra* note 18, at 324–28 (highlighting the impact of the military on the historical and social development of Guam); KATHERINE T. MCCAFFREY, MILITARY POWER AND POPULAR PROTEST: THE U.S. NAVY IN VIEQUES, PUERTO RICO 43–50 (2002) (examining the cultural impact of the military on Puerto Rican identity); Tanji, *supra* note 188, at 104–06 (discussing the

military used the island of Vieques, Puerto Rico, to conduct bombings and military exercises for over sixty years.¹⁹² As a result of the bombings and tests, the people of Vieques have seen their beautiful environment destroyed, and have long suffered from some of the highest rates of illness in the Caribbean.¹⁹³ It is hard to imagine similar scenarios occurring on the American mainland where the people of the States are represented by voting elected officials in Washington and electors in the presidential elections—such damaging large-scale military exercises would likely be met with strong political resistance and consequences.

Third, the significant military presence in some of the Territories renders them particularly susceptible to threats from terrorists and foreign powers. For instance, in 2017, North Korea made specific threats to bomb Guam during its ongoing conflict with the United States.¹⁹⁴ Because of their small size and distance from the continental United States, the large military presence in some of the Territories makes them prime targets for enemies of the United States who may otherwise not launch an attack against the American mainland.¹⁹⁵

D. Geographic Isolation

The Territories are geographically isolated from the continental United States, and this literal disconnect has had profound legal and extra-legal implications for the people of the Territories.¹⁹⁶ Despite advances in technology, the inevitable and sometimes harsh barriers of geography still persist.¹⁹⁷ The geographic gulf between the Territories and the continental United States has

psychological and cultural impact of the military presence on Guam); Jon Letman, *Proposed US Military Buildup on Guam Angers Locals Who Liken it to Colonization*, THE GUARDIAN (Aug. 1, 2016), <https://www.theguardian.com/us-news/2016/aug/01/guam-us-military-marines-deployment> [<https://perma.cc/A6FP-JALA>]; Letter on Military Buildup on Guam, *supra* note 185.

RIM PSYCHOL. 33, 35 (2007) (“Although generally economically positive, the military build-up engenders the fear within some of the people of being targeted for destruction because of a close relationship with the US military and proximity to the US Air Force and naval bases on Guam.”); Sang-Hun, *supra* note 194.

196. See, e.g., Torruella, *Why Puerto Rico Does Not Need Further Experimentation with Its Future*, *supra* note 18, at 69 (arguing that citizens on the Territory of Puerto Rico are “treated unequally from those in the rest of the nation solely by reason of their geographical residence”).

197. See TIM MARSHALL, PRISONERS OF GEOGRAPHY: TEN MAPS THAT EXPLAIN EVERYTHING ABOUT THE WORLD 1–2 (2016) (“Technology may seem to overcome the distances between us . . . but it is easy to forget that the land where we live, work, and raise our children is hugely important and that the choices of those who lead . . . will to some degree always be shaped by the rivers, mountains, deserts, lakes, and seas that constrain us all—as they always have.”).

been a significant factor in the unfulfilled and forgotten legal and political status of the Americans in the Territories.¹⁹⁸

First, the Territories are physically disconnected from the continental United States. All of them are at least 1,000 miles away from the nearest major city in the continental United States. Some Territories, like Guam, are over 5,000 miles away from the nearest major city in the continental United States.¹⁹⁹ Because of this geographic distance and isolation, the Territories are frequently viewed as remote and foreign, or as the Supreme Court (in)famously termed “foreign to the United States in a domestic sense.”²⁰⁰ The map and chart below highlight the physical and geographic isolation of the Territories relative to the continental United States:

Figure 1: Map of the Territories

CNMI	5,540 miles ²⁰⁹	11 h, 0 min. ²¹⁰
------	----------------------------	-----------------------------

Second, the geographic isolation of the Territories makes it easier for them to be overlooked and forgotten by policymakers and their fellow Americans in the mainland. This factor of geography is frequently unappreciated by policymakers, and serves as implicit and explicit motivations to overlook and mistreat the people of the Territories.²¹¹ In 2017, a poll revealed that only fifty-four percent of Americans knew that Puerto Ricans are Americans.²¹² This ignorance exists despite the fact that, among the Territories, Puerto Rico has the largest diaspora in the mainland—over five million in the States—which dwarfs the population of all the other Territories combined.²¹³ Additionally, there have been a number of Congressional representatives, a Supreme Court Justice, and numerous celebrities and athletes of Puerto Rican descent in recent years.²¹⁴

209. See *Distance from Saipan, Northern Mariana Islands to Seattle*, TIMEANDDATE.COM, <https://www.timeanddate.com/worldclock/distanceresult.html?p1=934&p2=234> [https://perma.cc/Z3ZP-B9WU]. Given the average Americans' ignorance of Puerto Rico, it can be reasonably inferred that the average American knows even less of their fellow Americans from Guam, American Samoa, the Northern Mariana Islands, or the US Virgin Islands.²¹⁵ Furthermore, unlike States that possess political power and natural neighboring allies, the Territories do not have consistent, regional political allies for their causes and interests.²¹⁶ Representatives from the South or New England, for instance, have shared interests and frequently vote as a bloc.²¹⁷ No such natural, geographic political allies exist for the Territories, which are dispersed far and wide from the other States and many of their fellow Territories. While the Puerto Rican diaspora in the American mainland is large, elected officials in areas with large populations of former residents of Puerto Rico still have to prioritize local constituent needs over the needs of Puerto Rico. As such, from a policy perspective, the interests and causes of the Territories—individually and collectively—are often forgotten.

Third, the geographic isolation of the Territories has had a serious economic impact on the lives of their people. Because of their geographic remoteness, the costs of goods and services on the islands are generally higher than those of their fellow Americans in the States, to the extent they are even available locally.²¹⁸ The geographic isolation of the Territories means that goods and services frequently have to travel costly routes by sea or air over great

217. *See* ANDREW GELMAN ET AL., RED STATE, BLUE STATE, RICH STATE, POOR STATE: WHY AMERICANS VOTE THE WAY THEY DO 67–70 (2008) (examining the regional voting trends among states); DONALD G. SAARI, GEOMETRY OF VOTING 308 n.19 (1994) (“Regional voting in Congress is becoming increasingly important for many policy factors. Indeed, for many issues, the concerns of a region overtake those of the individual states.”).

218. *See* KRISTA PERREIRA ET AL., URBAN INST., PUERTO RICO HEALTH CARE INFRASTRUCTURE ASSESSMENT 6 (2017) (discussing the increased cost of living in Puerto Rico due to, among other things, groceries); Ed Morales, *Puerto Rico's Soaring Cost of Living, from Giant Electric Bills to \$5 Cornflakes*, GUARDIAN (July 12, 2015), https://www.theguardian.com/world/2015/jul/12/puerto-rico-cost-of-living [https://perma.cc/3JL3-N3JH].

distances to reach the Territories.²¹⁹ These transportation costs are then passed on to the people of the Territories, thereby increasing their cost of living. In addition, the people of the Territories frequently have to travel thousands of miles to the American mainland to seek certain opportunities, services, and life-saving medical measures at great cost and risks that do not have to be borne by many of their fellow Americans on the mainland.

In sum, the geographic isolation of the Territories impacts the people living there in passingly prosaic as well as deeply profound ways. For the Territories, as the famed novelist Abraham Verghes wrote, “geography is destiny,”²²⁰ and unfortunately that destiny has largely been shaped by others.

* * *

The people of the Territories are Americans, but they bear a cauldron of burdens that their fellow citizens in the States do not have to carry. They bear the interconnected afflictions of political powerlessness, economic distress, military presence, and geographic isolation that frequently render them lesser and forgotten Americans.

III.

PAST PATHS FOR PROGRESS

The fight for full and fair political rights for the Territories is not new.²²¹ Many past paths have been traveled for more than a century without meaningful success, and many continue to be pursued by supporters of the Territories. Among the past traveled roads, three are particularly prominent and worthy of closer examination: litigation, statehood, and independence. Each of these three prior paths remains frequently pursued routes by advocates for the Territories, despite the fact that the haunted obstacles of the past continue to exist in the present.

A. Litigation

Litigating for more substantive political rights and political change for the Territories is remarkably appealing in a nation of laws, where courtrooms are

219. See, e.g., GOV'T ACCOUNTABILITY OFF., PUERTO RICO: CHARACTERISTICS OF THE ISLAND'S MARITIME TRADE AND POTENTIAL EFFECTS OF MODIFYING THE JONES ACT 8–13 (2013) [hereinafter PUERTO RICO: CHARACTERISTICS OF THE ISLAND'S MARITIME TRADE], <https://www.gao.gov/products/GAO-18-160?source=ra> [<https://perma.cc/ZE9M-G5N4>]; THOMAS GRENNES, MERCATUS RESEARCH, AN ECONOMIC ANALYSIS OF THE JONES ACT 14–15 (2017).

220. ABRAHAM VERGHESE, CUTTING FOR STONE 8 (2009).

221. See, e.g., Cabranes, *supra* note 18, at 396–402 (chronicling the long political struggles of the Territories, particularly Puerto Rico); Elizabeth A. McKibben, *The Political Relationship Between the United States and Pacific Islands Entities: The Path to Self-Government in the Northern Mariana Islands, Palau, and Guam*, 31 HARV. INT'L L.J. 257, 291–92 (1990) (summarizing the decades-long history of the Territories of Guam and CNMI's fight for more political power).

frequently the preferred forums to fight for political rights and social change.²²² As the French political scientist and historian, Alexis de Tocqueville observed nearly two centuries ago: “There is hardly a political question in the United States which does not sooner or later turn into a judicial one.”²²³ Judicial intervention may be particularly helpful for the Territories because the protective mechanisms of the political processes within our democracy have either failed them, or are simply unavailable to them. The Territories are in many ways the quintessential “discrete and insular minorities” of constitutional law’s famous *Carolene Products* footnote 4 who need the protection of “more searching judicial inquiry.”²²⁴ Nevertheless, litigation is not a practical primary avenue for achieving meaningful progress in the near future for the Territories. In particular, litigation on behalf of the Territories faces the serious obstacles of time and precedents that stand in the way of producing any tangible political benefits for the people of the Territories in the near future.

1. *The (Im)practicalities of Litigation*

Litigation is not a viable path to achieve much-needed short term relief or political progress for the Territories. The length of litigation and inevitable appeals in connection with complex legal disputes with serious political and constitutional implications can take years to navigate through our judicial processes.²²⁵ For instance, the odds are slim that a case involving the Territories will work its way to the Supreme Court and receive a favorable ruling since the Court grants certiorari to only a very small number of cases each year—about 80 out of 8,000 cases filed each term.²²⁶ Furthermore, assuming that there is an improbable victory in the courts, enforcement of any relief granted could also take years through our political processes.²²⁷

222. See JEB BARNES & THOMAS F. BURKE, *HOW POLICY SHAPES POLITICS: RIGHTS, COURTS, LITIGATION, AND THE STRUGGLE OVER INJURY COMPENSATION* 1 (2015) (“Litigation is everywhere in American society, casting its long shadow over businesses, schools, public spaces, private lives, and nearly every aspect of government and policymaking.”); STUART A. SCHEINGOLD, *THE POLITICS OF RIGHTS: LAWYERS, PUBLIC POLICY, AND POLITICAL CHANGE* 4 (2d ed. 2004) (“In the United State we have long been accustomed to associating lawyers (albeit a small minority of the bar) with programs to alter the status quo.”); Holly J. McCammon & Allison R. McGrath, *Litigating Change? Social Movements and the Court System*, 9 *SOC. COMPASS* 128, 128 (2015) (“A clear trend in US social movement activism in roughly the last half century has been increased use of litigation in efforts to bring about social change.”).

For instance, *Brown v. Board of Education of Topeka* held in 1954 that racial segregation in public education was unconstitutional.²²⁸ In fact, a year after the initial *Brown* decision, the Supreme Court held in a follow-up case, *Brown v. Board of Education II*, that desegregation should happen with “all deliberate speed,” as many localities refused to follow the first *Brown* ruling.²²⁹ Despite these rulings from the Supreme Court, it nevertheless took decades for true desegregation to occur in many parts of the country.²³⁰

Similarly, litigating to secure political rights, such as full voting rights in Congress and in presidential elections for the people of the Territories, could arguably be just as complex and time consuming as the fight for desegregation in schools, and perhaps even less certain in their outcomes. Using litigation as the primary path towards achieving more political rights for the Territories could also have the unintended consequence of making political processes and other opportunities for progress much more difficult, as limited resources and attention become consumed by the litigation.²³¹

Recent cases that implicated the political rights and status of the Territories suggest that litigation is a particularly lengthy and treacherous path as a means to meaningful progress for the Territories in the near term. First, in *Tuaua v. United States*, a case involving the right to full citizenship for the people of American Samoa, the entire litigation from the filing of the initial complaint to the denial for cert from the US Supreme Court took nearly four years to reach the conclusion that American Samoans are not entitled to full citizenship status.²³² Second, in *Puerto Rico v. Sanchez Valle*, a Supreme Court case holding that Puerto Rico was not a “separate sovereign” for the purposes of double jeopardy, the entire litigation also spanned nearly four years.²³³ Finally, in *Puerto Rico v. Franklin California Tax-Free Trust*, a Supreme Court case holding that Puerto Rico, as a Territory and not a State, was preempted by federal law to enact its own municipal bankruptcy law, lasted nearly two years.²³⁴ In each of these three cases, advocates on behalf of the Territories lost, so we do not know how

long the practical judicial enforcements and effects of a courtroom victory may take to become a political reality for the people of the Territories.²³⁵

In sum, litigation offers a difficult and impractical path to progress in the near term for the Territories. For the people of the Territories, victories in litigation, to the extent they are even achievable, can seem like pyrrhic victories when juxtaposed with the grim long-term outlooks of storm-torn neighborhoods, shuttered businesses, bombing threats, dilapidated schools, and mass exoduses of family and friends.

2. *The Problem of Precedents*

Beyond the practical challenges of litigation as a way to meaningful near-term progress, there are also substantive ones: longstanding legal precedents that present serious obstacles for the Territories. In particular, a series of cases decided in the early 1900s, known as the *Insular Cases*, continues to present a strong legal roadblock for territorial political rights as the leading judicial precedents on matters related to the Territories.²³⁶ Recent cases before the Supreme Court suggest that the Court is reticent to use its judicial powers to help address the grievances of the Territories by overturning more than a century of precedents.²³⁷

The *Insular Cases* refer to a set of Supreme Court cases from the early 1900s about issues pertaining to territories acquired by the United States in the latter half of the 1800s.²³⁸ A more expansive view of this line of cases may also

235. See SCHEINGOLD, *supra* note 222, at 8 (“The courts are, however, only modestly endowed with coercive capabilities—adequate, perhaps, for dealing with recalcitrant individuals but probably insufficient for bringing large groups or powerful institutions into line.”).

236. See Gerald L. Neuman, *Introduction*, in RECONSIDERING THE INSULAR CASES xiv (Gerald L. Neuman & Tomiko Brown-Nagin eds., 2015) (noting that the *Insular Cases* “continue[] to provide the foundation for governing inhabited territories and small islands without permanent populations”); Sam Erman, *Citizens of Empire: Puerto Rico, Status, and Constitutional Change*, 102 CALIF. L. REV. 1181, 1200–04 (2014) (discussing the ambiguous and lasting impact of the *Insular Cases* on the Territories).

237. See *American Samoa and the Citizenship Clause: A Study in Insular Cases Revisionism*, in *Developments in the Law — The U.S. Territories*, 130 HARV. L. REV. 1680, 1680 (2017) (“[T]he Supreme Court has continued to invoke the *Insular Cases* framework in twenty-first-century disputes involving the struggle against international terrorism among other cutting-edge issues.”); see also *Sanchez Valle*, 136 S. Ct. at 1863 (holding that Puerto Rico is not a “sovereign” for the purposes of constitutional double jeopardy considerations based on the *Insular Cases*); *Franklin Cal. Tax-Free Tr.*, 136 S. Ct. at 1938 (holding that federal bankruptcy law preempts any local bankruptcy statute because Congress has ultimate authority over the Territories).

238. There is an open debate among legal scholars as to which cases should be categorized as part of the *Insular Cases*. See Christina Duffy Burnett, *A Note on the Insular Cases*, in FOREIGN IN A DOMESTIC SENSE: PUERTO RICO, AMERICAN EXPANSION, AND THE CONSTITUTION 389–92 (Christina Duffy Burnett & Burke Marshall eds., 2001). Many scholars believe that the *Insular Cases* include a set of decisions handed down in 1901, and possibly another case handed down in 1922. See generally *Balzac v. Porto Rico*, 258 U.S. 298 (1922); *De Lima v. Bidwell*, 182 U.S. 1 (1901); *Goetze v. United States*, 182 U.S. 221 (1901); *Grossman v. United States*, 182 U.S. 221 (1901); *Dooley v. United States*, 182 U.S. 222 (1901); *Armstrong v. United States*, 182 U.S. 243 (1901); *Downes v. Bidwell*, 182 U.S.

include a series of opinions involving Alaska, Hawaii, the Philippines, and Puerto Rico.²³⁹ The *Insular Cases* produced a set of key interrelated legal doctrines for all future courts adjudicating issues relating to the Territories.²⁴⁰

First, in *Downes v. Bidwell*, the Court held that Congress has virtually unrestricted authority to apply any Constitutional provisions to the Territories pursuant to its powers under the Territorial Clause of the Constitution.²⁴¹ This new doctrine reversed the Court's previous position that the Constitution of the United States "follows the flag to our territories."²⁴²

Second, the *Insular Cases* produced the doctrine of territorial incorporation.²⁴³ This doctrine holds that fully incorporated territories are afforded all the rights and privileges of the Constitution, while unincorporated territories are only afforded the particular Constitutional rights and privileges as designated by Congress.²⁴⁴ The legal doctrines set forth by the *Insular Cases* explain in large part why the people of the Territories possess so little political power in the national government: they are American citizens or non-citizen nationals living in unincorporated Territories that have not been granted full political rights by Congress.²⁴⁵

244. See, e.g., *id.* ("This doctrine divided domestic territory . . . into two categories: those places 'incorporated' into the United States and forming an integral part thereof (including the states, the District of Columbia, and the 'incorporated territories'); and those places not incorporated into the United States, but merely 'belonging' to it (which came to be known as the 'unincorporated territories')."); see also Torruella, *Ruling America's Colonies*, *supra* note 120, at 81.

245. Juan R. Torruella, *The Insular Cases: The Establishment of a Regime of Political Apartheid*, 29 U. PA. J. INT'L L. 283, 347 (2007) ("By its repeated decisions upholding the *Insular Cases* . . . the Supreme Court has created what amounts to a political ghetto in the territories . . . Puerto Rico's U.S. citizens have no effective way of exercising the political pressure that is normally available to U.S. citizens . . .").

The *Insular Cases* have been viewed by many as controversial cases rooted in outdated, racist logic from a bygone era of American imperialism.²⁴⁶ Legal scholarship and cases that served as the foundational basis of the *Insular Cases* referred to the Territories as “possessions,”²⁴⁷ and the people of the Territories as “savage,”²⁴⁸ “unfit to govern,”²⁴⁹ “half-civilized,”²⁵⁰ “ignorant and lawless brigands,”²⁵¹ and “impossible” of being governed “according to Anglo-Saxon principles.”²⁵²

Nevertheless, the *Insular Cases* from over a century ago remain the leading precedents for courts adjudicating issues related to the Territories.²⁵³ In the previously mentioned 2016 cases, *Franklin California Tax-Free Trust*, *Sanchez Valle*, and *Tuau*, the Supreme Court and the D.C. Circuit Court of Appeals either cited explicitly to the *Insular Cases* or implicitly upheld the underlying principles articulated in the *Insular Cases* by opposing more political rights for the Territories.²⁵⁴ For instance, in *Franklin California Tax-Free Trust*, the Court held that Puerto Rico was a “State” for the purposes of federal preemption under the Bankruptcy Code, but not a “State” for the purposes of being empowered to establish its own municipal bankruptcy law.²⁵⁵ The Court’s convenient sophism in *Franklin California Tax-Free Trust* was akin to its convenient sophism from its 1901 ruling in *Downes*, when it claimed that Puerto Rico was “foreign to the United States in a domestic sense.”²⁵⁶ As such, the long history and precedential

246. See, e.g., Martha Minow, *Preface*, in RECONSIDERING THE INSULAR CASES: THE PAST AND FUTURE OF THE AMERICAN EMPIRE vii, vii (Gerald L. Neuman & Tomiko Brown-Nagin eds., 2015) (“When the Supreme Court reached its judgments in the *Insular Cases*, prevailing governmental attitudes presumed white supremacy and approved of stigmatizing segregation.”); RUBIN FRANCIS WESTON, *RACISM IN U.S. IMPERIALISM: THE INFLUENCE OF RACIAL ASSUMPTIONS ON AMERICAN FOREIGN POLICY, 1893–1946*, at 15 (1972) (“The racism which caused the relegation of the Negro to a status of inferiority was to be applied to the overseas possessions of the United States.”); José A. Cabranes, *Puerto Rico, Colonialism as Constitutional Doctrine*, 100 HARV. L. REV. 450, 458–59 (1986) (critiquing the underlying norms and values of the *Insular Cases*); Andrew Kent, Boumedine, Munaf, and the Supreme Court’s Misreading of the *Insular Cases*, 97 IOWA L. REV. 101, 110 (2011) (commenting on the *Insular Cases*’ “deplorable discussions of the supposed racial and cultural inferiority of inhabitants of the newly annexed island territories”); Torruella, *The Insular Cases*, *supra* note 245, at 286 (opining that the *Insular Cases* were “strongly influenced by racially motivated biases and by colonial governance theories that were contrary to American territorial practice and experience”).

power of the *Insular Cases* renders litigation a tough route towards meaningful near-term progress for the Territories.

To be clear, these critiques about the uncertainty, length, and precedential obstacles confronting litigation for the Territories are not meant to suggest that litigation should not be pursued at all. Rather, these critiques are offered to suggest that litigation should not be *the* primary path traveled to achieving near-term progress for the Territories. Nevertheless, the fight in the courts should and must continue as one of many paths pursued on behalf of the Territories. Victorious courtroom judgments, while elusive, are possible. The damaging and misguided precedents and legacies of the *Insular Cases* can perhaps be best and most swiftly overturned in the courts.²⁵⁷ Moreover, litigation can help mobilize people, change institutional norms, and persuade policymakers toward meaningful lasting political changes for the territories.²⁵⁸ Thus, litigation for full and equal rights must continue, but it should be part of a multifaceted effort to produce tangible near-term and long-term progress for the Territories.

B. Statehood

Statehood is an appealing pathway to progress for the Territories, but it is ultimately a path with serious, and perhaps insurmountable, obstacles in the near term. The stark realities of our time suggest that achieving statehood for any or all of the Territories would be difficult given the respective sizes of the Territories and the hyper-partisan politics in contemporary Washington.

First, each of the Territories except Puerto Rico does not have the population to be credibly considered a state by many, given the populations of today's states.²⁵⁹ Wyoming, the smallest state by population as of the most recent census in 2010, has approximately 560,000 people.²⁶⁰ Each Congressional district as of the last census in 2010 has approximately 711,000 people.²⁶¹ None of the Territories except Puerto Rico has even 200,000 people.²⁶² Given their

257. See Torruella, *Why Puerto Rico Does Not Need Further Experimentation with Its Future*, *supra* note 18, at 98 (“Clearly, it is up to the courts as guardians of the Constitution, and as the originators of this unequal treatment [of the Territories] when they validated it in the *Insular Cases*, to correct this condition.”).

258. See, e.g., SCHEINGOLD, *supra* note 222, at 8 (discussing how litigation “can be useful for political mobilization” and “reshaping the political arena”); Robert C. Lieberman, *Ideas, Institutions, and Political Order: Explaining Political Change*, 96 AM. POL. SCI. REV. 697, 709 (2002) (suggesting that litigation can work in tandem with other activity to fuel political change).

259. See Raskin, *supra* note 2, at 566 (arguing that it is hard to justify two US Senators for any of the Territories besides Puerto Rico given their small populations).

260. U.S. Census Bureau *QuickFacts: Wyoming*, U.S. DEP’T COM., <https://www.census.gov/quickfacts/fact/table/WY/PST045216> [<https://perma.cc/F6VU-2BKS>].

262. See *supra* notes 112–116 and accompanying text.

relatively small populations, it is hard to imagine Congress granting each of the Territories two US Senators and a full voting member of the House of Representatives.

Second, population aside, the highly partisan nature of contemporary politics makes it extremely unlikely for any of the Territories to be admitted into the Union as a State. The highly partisan politicians of the last two decades who routinely obstruct budgets, presidential nominations, debt ceiling hikes, and important legislation would be unlikely to cast aside their differences and come together to make the significant moves necessary to admit one or more of the Territories into the Union as a new State.²⁶³

Article IV of the Constitution authorizes Congress to admit new states into the Union. It states “[n]ew States may be admitted by the Congress into this Union.”²⁶⁴ While the Constitution gives Congress the authority to admit new states, it does not prescribe a particular process for the admission of new states. Historically, a territory would hold a referendum and petition Congress for statehood to initiate the process of admission into the Union as a state.²⁶⁵ If Congress wished to grant statehood thereafter, it had to pass an enabling act establishing a process for the territory to draft a state constitution and elect representatives.²⁶⁶ Once a state constitution had been drafted and ratified, Congress would review it and pass an admission act or resolution that accepted the territory as a state.²⁶⁷ This penultimate move by Congress effectively approved the constitution of that prospective state and provided for its admission to the United States; the President would then sign the resolution to acknowledge and proclaim the territory a State.²⁶⁸

Every one of these sequential steps requires wide consensus in the Congress, and each step must be satisfied prior to moving forward to the next stage.²⁶⁹ Given the contemporary norm of political gridlock and obstruction in

Washington, a large bipartisan effort to admit a new state into the Union or to pass a constitutional amendment to grant the Territories more voting rights short of statehood seems unlikely.²⁷⁰

Of all of the Territories, Puerto Rico and its more than three million people can make the strongest case for statehood. In fact, Puerto Rico has pursued statehood for several years after multiple referendums favoring it.²⁷¹ For instance, in 2012, Puerto Rico held a public referendum on petitioning for statehood in which a large majority of the voters supported it.²⁷² In 2013, the Committee on Energy and Natural Resources of the United States Senate received testimony on the 2012 referendum, acknowledging that a majority of Puerto Ricans opposed their current territorial status.²⁷³ Representatives in Congress have introduced bills multiple times in the last few years that were effectively enabling acts to permit Puerto Rico to attain statehood status, but they have not made it out of the committee process.²⁷⁴ In 2017, Puerto Rico again voted by an overwhelmingly ninety-seven percent for statehood in a nonbinding referendum, with independence and status quo as the alternatives.²⁷⁵ Following that vote, Puerto Rico Governor Ricardo Rosselló urged Congress to grant statehood to his territory.²⁷⁶ However, because the referendum was nonbinding, and because Congress has wide discretion in deciding whether to grant

to be made, and above all a majority vote had to be achieved in both houses in the same session of Congress.”).

statehood, the recent Puerto Rican push for statehood has made no meaningful progress.²⁷⁷ It is hard to contemplate a plausible near-term scenario in which there would be a broad political consensus to admit into the Union a new state that has been ravaged by storms and burdened by insurmountable debts like contemporary Puerto Rico.

C. Independence

In addition to litigation and statehood, independence is the other prominent path to progress for the Territories that has received much attention in the past. While independence is generally not perceived to be as appealing as statehood, it is frequently offered as an alternative in referendums in the Territories.²⁷⁸ Because it is often proffered as a plausible alternative to the people of the Territories, it is worth some examination.

Similar to the path of statehood, the path of independence is full of serious practical and political obstacles. First, there is no broad support in any of the Territories for independence, as many people in the Territories view themselves as Americans and wish to remain a part of America, albeit with their distinct territorial identities.²⁷⁹ For example, the option of independence has been the least popular choice in recent Puerto Rican referendums about their political status.²⁸⁰ Second, Congressional action is required for a Territory to become

independent and secede from the United States.²⁸¹ For instance, the United States granted the Philippines, a former American territory, full independence in 1946.²⁸² Given the complex geopolitical, legal, economic, and political considerations involved in granting independence to any or all of the Territories, it is difficult to see how a frequently contentious contemporary Congress could ever reach a consensus on such an important matter for one or all of the Territories. In sum, because of its lack of popular and political appeal, independence is not a viable path for progress in the Territories, in the near-term or otherwise.

* * *

Many roads have been traveled by the Territories and their well-intentioned supporters to help them gain more political rights. Among the various roads traveled, the paths of litigation, statehood, and independence are perhaps most notable. Unfortunately, to date none of these three roads have led to any meaningful progress. Nevertheless, the lack of success thus far does not mean that these roads, in particular litigation, are not worth exploring or pursuing at all. Instead, the lack of success along these paths suggests that new alternative routes must be explored while the fight along the well-traveled paths of the past continues in order to bring much-needed tangible progress to the Territories in the near term.

IV.

NEW WAYS FORWARD

The plight of the Territories urgently demands new ways forward to better help these often-forgotten Americans. While many of the larger legal issues about the political status and political rights of the Territories remain open questions, our nation's obligations to our fellow Americans in the Territories should not be questioned. While larger longstanding issues work through lengthy legal and political processes, the Territories and the federal government can take key actions requiring less consensus and less time in the near term. Until significant progress has been made on those larger issues, policymakers and advocates for the Territories should dedicate more resources and attention to pursuing three new paths forward: (1) a temporary extended waiver of the Jones Act's application to the Territories, (2) a most-favored state status in veteran and

REV. 437, 491–92 (2002); Anna Fifield, *Some in Guam Push for Independence from U.S. as Marines Prepare for Buildup*, WASH. POST (June 17, 2016), https://www.washingtonpost.com/world/asia_pacific/some-in-guam-push-for-independence-from-us-as-marines-prepare-for-buildup/2016/06/16/e6152bd2-324b-11e6-ab9d-1da2b0f24f93_story.html?utm_term=.47e5e1baa324 [<https://perma.cc/7RY4-RJK6>].

282. See Treaty of General Relations between the United States of America and the Republic of the Philippines, US–Phil., July 4, 1946, 61 Stat. 1174, T.I.A.S. No. 1568.

disaster relief appropriations, and (3) a special economic empowerment zone designation for each of the Territories. These three new pathways forward offer real and workable opportunities to substantively improve the lives of the people of the Territories in the immediate future.²⁸³

A. Extended Jones Act Waiver

The Territories and their advocates should seek an extended waiver of the Jones Act as a means to achieving some tangible near-term progress. The Jones Act, section 27 of the Merchant Marine Act of 1920, places a significant economic strain on the Territories by restricting what ships may carry goods into its ports. This Act should be waived for an extended period of time of at least five years for the Territories, or until significant progress has been made on the larger question about the political status and powers of the Territories.²⁸⁴ An extended Jones Act waiver is an appealing, sensible new path forward because it is a politically feasible action that would have an immediate impact on bettering the lives of the Americans in the Territories. In particular, those living in Guam and Puerto Rico would benefit—many aspects of the Jones Act already exempt the Territories of American Samoa, Northern Mariana Islands, and US Virgin Islands from its application.²⁸⁵

The Jones Act imposes significant costs on almost all the goods for Territories subject to the Act, particularly Puerto Rico and Guam.²⁸⁶ The Jones Act mandates that all commercial shipping within the United States be conducted by ships built domestically, owned at least seventy-five percent by Americans, and staffed with an American crew.²⁸⁷ The chief purposes of the Jones Act are the enhancement of our national defense, the promotion of domestic maritime commerce, and the sustainment of domestic shipbuilding capabilities.²⁸⁸ The Jones Act ostensibly prevents foreign ships from operating in American maritime commerce, and renders the applicable Territories particularly reliant on businesses and suppliers in the American mainland.²⁸⁹ Furthermore, while States

283. The discussions of these three proposals do not mean to suggest that these are the only three paths forward. There are other innovative proposals being offered and examined to aid the Territories. See, e.g., Weare, *supra* note 190, at 279–92.

288. See JOHN F. FRITTELLI, CONG. RESEARCH SERV., THE JONES ACT: AN OVERVIEW (2003); PUERTO RICO: CHARACTERISTICS OF THE ISLAND'S MARITIME TRADE, *supra* note 219.

289. See, e.g., Torruella, *Why Puerto Rico Does Not Need Further Experimentation with Its Future*, *supra* note 18, at 92 (“Puerto Rico is a captive market of the United States — about half of goods imported are purchased from the mainland United States, and Puerto Ricans are the largest per capita

in the continental United States have air, rail, and roads to transport goods from long distances in a cost-effective manner, Guam and Puerto Rico (and Hawaii and Alaska) are largely dependent on shipping for most of the goods not produced within their own locales.²⁹⁰ As a result of the Jones Act, goods shipped to Guam and Puerto Rico from a foreign state or foreign vessel frequently have to take costly detours to be reloaded on an American vessel that is compliant with the law.²⁹¹ This means that almost everything that comes to these two Territories, including necessities like fruits, vegetables, meats, and fuel, are subject to additional costs that otherwise would not exist.²⁹² For instance, according to estimates by the Federal Reserve Bank of New York, it costs nearly twice the amount to ship the same volume of goods from the American East Coast to Puerto Rico than to nearby destinations in the Dominican Republic or Jamaica as a result of the Jones Act restrictions.²⁹³

As proposed herein, the Jones Act should be temporarily waived for an extended period of at least five years with a presumption of automatic renewal. This would allow businesses and the Territories more time and certainty to make their plans. Because the legislation was drafted to include only certain Territories, large parts of the Jones Act apply only to Guam and Puerto Rico, an extended waiver would help put these two Territories on a level playing field with their fellow Territories. An extended waiver could immediately help the people of Guam and Puerto Rico by lowering the costs of all goods coming into the island that were previously subject to Jones Act-related expenses.²⁹⁴ Additionally, an extended waiver could serve as economic stimulus for many of the businesses in the Territories that rely on goods shipped from foreign destinations.²⁹⁵

Politically, waiver of the Jones Act, unlike a repeal, does not require Congressional action, and can be achieved through executive agency action,

importers of U.S. goods in the world — a large amount of the subsidized funds are in effect repatriated, and go to sustaining U.S. business and enterprises on the mainland[.]”)

292. See *id.*; PUERTO RICO: CHARACTERISTICS OF THE ISLAND’S MARITIME TRADE, *supra* note 219, at 20 n.28.

293. FED. RES. BANK N.Y., *supra* note 286, at 13.

294. See *id.* (emphasizing that advocates have previously supported a 5-year exemption to the Jones Act for Puerto Rico as a means to improve business conditions on the island).

295. See Robert Z. Lawrence & Juan Lara, *Trade Performance and Industrial Policy*, in THE ECONOMY OF PUERTO RICO: RESTORING GROWTH 507, 528–31 (Susan M. Collins et al. eds., 2006).

thereby making it more politically feasible.²⁹⁶ Waivers of the Jones Act can be granted via requests to the Department of Defense or the Department of Homeland Security.²⁹⁷ The Jones Act has previously been waived on numerous occasions, albeit for very short periods of time.²⁹⁸ In the aftermath of the hurricanes that devastated Puerto Rico, the Trump administration waived the Jones Act for ten days to allow much-needed goods and relief supplies to enter the island.²⁹⁹ While helpful, such a short waiver makes it difficult for businesses and Puerto Rico to plan accordingly. An extended Jones Act waiver will create the stability and certainty necessary to help attract investments and business developments in the Territories of Guam and Puerto Rico.

Furthermore, while the Jones Act impacts the Territories (and Alaska and Hawaii) disproportionately, multiple studies have indicated that the Jones Act may be costing mainland American consumers and businesses between five and fifteen billion dollars annually.³⁰⁰ As such, there may be some broader political appeal to using the extended waiver as a means to study the effects of a repeal in the long run. For instance, elected officials who favor free market policies and consumer protection may find the extended waiver politically appealing because it allows a time-limited way to challenge a costly protectionist policy without offending some of their key constituents.³⁰¹

To be clear, passing an extended Jones Act waiver for the Territories will not necessarily be a quick and easy political task. The Jones Act, with all its faults, also has some merit and many powerful supporters, like certain national defense advocates, maritime union supporters, and elected officials with political ties to American shipyards and shipbuilders.³⁰² Nevertheless, an extended waiver of the Jones Act represents one of the more politically plausible paths towards creating immediate tangible benefits for the Territories.

B. Most-Favored State Appropriations

The Territories and their advocates should seek temporary most-favored state (MFS) status in appropriations related to Veterans Affairs (VA) and the Federal Emergency Management Agency (FEMA).³⁰³ This temporary MFS in VA and FEMA appropriations, lasting for a renewable period of five years, will help alleviate some of the harms that come from being politically powerless in Washington in the critical areas of veteran care and disaster relief.

Funds for veteran care and disaster relief are particularly critical to the Territories. In terms of VA facilities, veterans residing in the Territories do not have the same kind of support as their peers on the mainland despite their high military participation rates and veteran populations.³⁰⁴ For instance, Guam was ranked last in VA per capita spending in 2012; it does not even have a meaningful in-patient veteran care facility despite having “one of the highest concentrations of military veterans among U.S. states and territories.”³⁰⁵ Similarly, American Samoa has the highest per capita military enlistment of any state or territory, but its treatment facilities for veterans do not reflect its people’s sacrifices.³⁰⁶ Veterans from American Samoa and Guam frequently have to travel thousands of miles to seek medical attention in Hawaii or the American mainland.

Furthermore, without any meaningful political power in Washington to advocate for disaster relief assistance, the priorities of the Territories are often left to the whims of elected officials in Washington who care more about their voting constituents than the distant residents of the Territories.³⁰⁷ The geographic locations of the Territories make them particularly vulnerable to catastrophic hurricanes and typhoons, as evidenced by the destructive storms that ravaged

Puerto Rico, US Virgin Islands, and the CNMI in 2017 and 2018. In the aftermath of the two apocalyptic storms in 2017 that devastated Puerto Rico, President Trump openly suggested withdrawing federal disaster relief funds while the island was just beginning its recovery, and Congress took over a year to provide additional disaster relief aid.³⁰⁸ A year later in 2018, while the island continued to struggle with its recovery, President Trump openly denied the rising death toll connected with Hurricane Maria that was approaching 3,000 casualties. In 2019, President Trump again openly disparaged the local leaders of Puerto Rico and suggested withholding further disaster relief funding.³⁰⁹ Such denials and suggestions about disaster relief appropriations were not made by the Trump administration or previous administrations for devastating storms that struck Florida, Louisiana, North Carolina, and Texas.

The concept of MFS status is borrowed from the international trade law's concept of the most-favored nation status.³¹⁰ Under the seminal legal framework of the General Agreement on Tariffs and Trade of 1947 (GATT), the most-favored nation treatment principle means that "any advantage, favour, privilege or immunity granted by any contracting party . . . shall be accorded immediately and unconditionally to the like product originating in or destined for the territories of all other contracting parties."³¹¹ In practice, a nation-state that is conferred MFS status will generally receive trading terms co-equal to the nation-state receiving the most preferential treatment from the granting state, subject to certain limitations.³¹² As a member of GATT and its successor, the World Trade Organization (WTO), the United States has used the most-favored nation designation to normalize trade relationships with other nation-states.³¹³ For example, the United States granted permanent most-favored nation status to China when it became a member of the WTO in 2001. As a result, the United States gave China some of the most preferential trading terms relative to other

countries and permitted it to permanently bypass the previously contentious annual debates on its designation in Congress.³¹⁴

The Territories should seek to receive renewable temporary most-favored state status in VA and FEMA appropriations on a pro-rata basis from the federal government. This means that the Territories would receive the same appropriations as the States receiving the highest appropriations of VA and FEMA funding for a period of five years, consistent with the Congressional Budget Act's mandated timeline for federal budget resolutions.³¹⁵ As a simple illustration, if California were to receive \$5,000 per resident on VA and FEMA appropriations annually, and it represented the highest per capita appropriation level, then each of the Territories would receive that level of appropriation for its people. A narrow focus in these two critical areas of VA and FEMA appropriations may make the proposal more politically palatable. A blanket, across-the-board MFS status for all federal appropriations is likely a political nonstarter in Congress, and many appropriations to the States are inapplicable or unsuitable for the Territories.

MFS status for the Territories would alleviate some of the harms that come from being politically powerless in the national government and unable to fully advocate for the veterans and Americans living in the Territories. Representatives and senators from each of the States frequently advocate for favorable provisions and appropriations for their constituents in a way that non-voting representatives from the Territories simply cannot do for their people.³¹⁶ Elected officials from the Territories, due to their lack of political power in Washington, are often left to publicly plea for assistance through the media and hope that their pleas do not fall on deaf ears.³¹⁷

MFS status for the Territories would help remedy this situation by allowing federal appropriations to better reflect the reality that the cost-of-living in the Territories is by many measures higher than in the mainland because of geography.³¹⁸ Current appropriations for veteran care and disaster relief through the VA and FEMA, respectively, do not have cost-of-living adjustments despite

318. See, e.g., FED. RES. BANK N.Y., *supra* note 286, at 22 (alluding to the high costs of shipping that lead to price increases for residents of Puerto Rico).

the fact that a dollar in the continental United States frequently has more purchasing power than in the Territories. Put simply, disaster relief efforts are more expensive when goods have to travel thousands of miles across oceans.³¹⁹ Likewise, veterans seeking care for complex procedures and treatments have higher travel costs relative to veterans living on the mainland because they must fly thousands of miles to the American mainland, while veterans on the mainland can frequently drive to an appropriately equipped hospital.³²⁰

In sum, a renewable five-year MFS status for the Territories in federal VA and FEMA appropriations represents a sensible and workable policy that can bring about some immediate relief to the people of the Territories. Moreover, the renewable feature of the proposal will hopefully create a natural, periodic opportunity for the plight of the Territories to receive some meaningful attention in Congress during budget deliberations.

C. Economic Empowerment Zones

The Territories and their advocates should seek to have Congress temporarily designate each of the Territories as a special economic empowerment zone for a period of ten years. This would create a slate of economic incentives across multiple federal agencies, ideally designed to respond to the unique strengths and weaknesses of each Territory, to help stimulate the economies of the Territories.³²¹ Similar to the extended temporary waivers of the Jones Act and most-favored state appropriations, this temporary designation can bring significant near-term economic relief and stimulus for the Territories while the larger issues about political status and political power are being deliberated by various stakeholders.

In general, economic empowerment zone designations and their accompanying programs are designed to encourage investment activity and business development in economically distressed communities through a combination of favorable tax laws, grants, subsidies, jobs programs, regulatory

321. A similar idea was previously recommended by the special presidential task force on Puerto Rico of the Obama administration as a means to improve the economic conditions of the island. See REPORT BY THE PRESIDENT'S TASK FORCE ON PUERTO RICO'S STATUS 9 (2011). Unfortunately, that recommendation never materialized into final legislation or a formal program.

easing, and other economic incentives.³²² In the past, Congress and various States have used such programs to help improve rural and urban communities.³²³ For instance, some of the most economically developed portions of present-day Baltimore, Maryland, and Harlem, New York, were due in part to economic empowerment zone programs.³²⁴ Some of these programs have had remarkable successes following implementation, while others have been less fruitful.³²⁵ That said, it is often difficult to establish a clear causal link between the empowerment zone programs and their economic effects, as is the case with many economic incentive programs.³²⁶

Historically, empowerment zone programs have had bipartisan political support, thus making them a more politically feasible idea. Both Democrats and Republicans have found some appeal in using government incentives and deregulation to stimulate market-oriented, localized community economic development.³²⁷ The most prominent federal and state empowerment zone programs found their origins in the 1980s under the Reagan administration and

the 1990s under the Clinton administration.³²⁸ More recently, as part of the Tax Cuts and Jobs Act of 2017, areas of each of the Territories were designated as “qualified opportunity zones,” entitled to certain tax incentives and benefits intended to spur investments.³²⁹

As proposed herein, each of the Territories would be designated a special economic empowerment zone for a period of ten years. This designation would help attract investment and business activity to the Territories, each of which has had stagnant growth and higher unemployment rates compared to national figures over the last decade.³³⁰ Ideally, the designating legislation and accompanying programs would be designed with the input of key stakeholders from the Territories who are most knowledgeable about each Territory’s strengths and needs. If designed properly, economic empowerment zone programs coupled with smart local efforts would help foster near-term economic growth in the Territories, create local job opportunities, improve the daily lives of the people living there, and decrease each Territory’s reliance on uncertain funds from the federal government.³³¹ For instance, in the aftermath of two catastrophic hurricanes in 2017, the government of Puerto Rico has made modest efforts to attract entrepreneurs and investors in businesses related to filmmaking, financial technology, and cannabis to the island.³³² While the efficacy of these modest local efforts remains to be seen, additional incentives provided via a special federal economic empowerment zone designation could make the island more attractive to entrepreneurs from the American mainland and around the world in the near term.

In addition to helping the Territories, these programs can create “new markets” for businesses, entrepreneurs, and investors from the mainland.³³³ Such programs for each of the Territories may be particularly appealing because they are nimble enough to aid each Territory according to their own specific strengths and needs; the programs are ultimately localized and market-oriented in their design, implementation, and effects to attract a wide and diverse population of investors with different investment preferences and outlooks.³³⁴ While businesses have become more socially conscious and more willing to engage with distressed communities to enhance social and business value, economic incentives nonetheless play a significant role in attracting large, long-term private investments in the first place.³³⁵

Understandably, the Territories may be reluctant to rely on federal, market-oriented incentive programs following the harrowing experience of Puerto Rico with the enactment and subsequent repeal of the section 936 tax incentive.³³⁶ While this type of skepticism and reticence is warranted, policymakers in both Washington and the Territories will have the benefit of learning from Puerto Rico’s previous experience (and hopefully will make better decisions to avoid similar pitfalls). However, even if similar mistakes are made with the economic empowerment zone programs, the near-term positive impact would likely outweigh the long-term uncertainties associated with such programs, especially since the Territories are all in need of some economic stimulus in the immediate and near future.

* * *

None of the three new pathways proposed here will solve all or even most of the complex and diverse set of problems confronting the Territories, collectively or individually, including complex, deep-seated issues involving the

Morgan’s Big Bet on Detroit Is Paying Off*, FORTUNE (May 10, 2017), <http://fortune.com/2017/05/10/jp-morgan-chase-detroit-investment> [<https://perma.cc/RC89-WLX7>] (reporting on the successful partnership of JPMorganChase’s Detroit project involving both large investments from the bank and smart incentives from the city).

336. See *supra* Part II.A for a discussion on the economic impact of the enactment and repeal of § 936 on Puerto Rico.

indigenous people of the Territories.³³⁷ Furthermore, drafting, passing, implementing, and executing these three new proposals may prove difficult. Nevertheless, these proposals offer a pragmatic trio of politically feasible policies to bring about immediate benefits to the people of the Territories while progress is being made on the longstanding, larger political issues. These proposals can hopefully move the conversations and plans of action beyond the well-traveled, but unsuccessful, paths of the past towards a more promising direction of real, tangible progress for the Territories.

CONCLUSION

The plight of the Territories presents one of the most vexing legal and political issues confronting national and local policymakers. The longstanding, strained legal status of the Territories frequently renders their residents lesser and forgotten citizens living in dire conditions, without a meaningful voice or vote in our government. Nevertheless, they are Americans in law and in fact. Their struggles are part of the larger struggles of Americans in the past and present for full rights and recognition from our government.

This Article offers an original, critical perspective on the struggles of the Territories, and pragmatic ways to provide them with meaningful assistance in the near term. It examines how we got here, why the Territories are suffering, what has been pursued in the past, and how we can do better in the near future. Throughout its analysis, this Article is mindful of the longstanding legal and political obstacles that have made reforms for the Territories so elusive. Rather than advocate for some grand legal framework that may theoretically solve the political predicaments of the Territories, this Article argues for three workable proposals that may be less satisfying in theory, but more meaningful in practice, given the current struggles in the Territories.

In particular, this Article advances politically feasible policy proposals designed to bring near-term, concrete assistance to the Territories in terms of lower transportation costs, more economic development, additional disaster relief, and upgraded veteran care. In doing so, this Article does not diminish or dismiss the longstanding deliberations and efforts focused on the larger political questions that have chronically confronted the Territories. Instead, it aspires to broaden the discussions and plans of action beyond just those large open political questions towards a new direction of tangible progress. In the end, this Article hopes to provide a workable framework for thinking and acting anew with greater urgency for our often forgotten, fellow Americans in the Territories.
